

The Atari 2600 console controls and controllers are mapped to the computer's keyboard as shown in the following tables. However, most of these events can be remapped to other keys on your keyboard or buttons on your joystick (see **Advanced Configuration - [Event Remapping](#)**). The tables below show the default settings.

Note: All key names are based on the US QWERTY [keyboard layout](#). If you use a different layout some keys may differ. You can use the following layout image as reference where to find the US keys on your keyboard.

~	!	@	#	\$	%	^	&	*	(	)	-	+	←
1	2	3	4	5	6	7	8	9	0	=	Backspace
